

Go Green with our Environmentally Friendly Printing!

In today's market
"Environmentally Friendly"
and outstanding performance are hot topics.

MCE is ready to meet your Ecofriendly printing requests, such as brochures, newsletters, and pamphlets just to name a few.

Maryland Correctional Enterprises now provides superior quality printing using CTP (computer to plate) technology. This new equipment allows us to move into the next generation of printing using environmentally friendly plates that excel in quality and improved production.

EcoFriendly printing without compromise...

State-of-the-art imaging technology provides output from computer files directly to the printing plate utilizing chemistry free plates, compared to older technology where computer files were output onto photographic film and then burned to a subtractive plate. Previously, this two step method required additional production, along with usage of hazardous chemistry or solutions needed for processing.

Some of the benefits include:

Outstanding Performance Features:

- Improved productivity and efficiency
- Increased color matching between proof and print
- Premium imaging quality
- Enhanced PDF workflow

Environmentally Friendly Features:

- Eliminates chemistry and hazardous processing chemicals
- Less waste with the reduction of film
- Reduced energy consumption (both heat and electrical usage)

For customers that deserve the best in value and customer service, Maryland Correctional Enterprises has an extensive selection of quality products and services to help your agency or business reach its full potential - all while staying within your budget.

Products...

- | | | |
