NEW
Unite System

Unite’s appearance is like no other panel system, because it originated like no other. The aesthetic considerations central to its conception show through in the finished product. Because it was designed from the outside in rather than the inside out, the system retains a slim Euroean profile that create openness in the workspace without sacrificing users’ privacy. Finished Unite panels are 3.5” thick to integrate seamlessly with architectural wall systems.

The MCE Sales Department will provide information on all of our products and our Design Department can create attractive, affordable layouts based on your office needs. Our Installation Department will coordinate all aspects of your delivery to assure a prompt set-up.

Perhaps even more important to Unite’s aesthetic than the space it takes up, is the space it does not. Glass and open space play vital roles throughout the system, reducing its impact on the environment both visually and ecologically. Frameless glass divider screens allow spaces to capture and use more natural light, reducing the need for ambient electrical lighting. Glass tiles do much the same while establishing a visual boundary between spaces. Panels with elevated bases and open legs improve air circulation without increasing distractions or ambient noise.
Fabric panels offer privacy and acoustic dampening to improve concentration in collaborative spaces.

Glass panels transmit light and provide an airy feeling while creating visual boundaries in a space.

Markerboard panels are made of steel, making them compatible with both magnets and markers.

The Unite grommet allows electrical and data/communications cables to pass neatly through the worksurface.
